Environment

Belle Muro's products are designed with mindful consideration of the future, embracing and respecting life in the present and caring for the wellbeing of generations to come. The fundamental design of our panels allows for remodelling and refreshing and recycling. Our panels are manufactured from good quality, long lasting materials and be easily be recycled or remade – reducing waste and landfill, lowering greenhouse gas emissions, reducing imports and increasing local employment. Beautiful, sustainable and cost effective. Our suppliers are active participants in waste reduction and recycling programs for manufacturing remnants.
